

#### About SUMS.WATER

Synergistic Utilities Management System.Water (SUMS.WATER) is a total business solution which is suitable for any water organisation which provides, for example, water, electricity or gas to its customers. Its integrated set of modules, which includes Financials, Water Billing and Management, A/C Receivables, A/C Payables, Inventory Control, Job and Resource Management, Fixed Assets, Human Resource and Payroll, provides a rich environment for quality decision making.

SUMS.WATER - Powered by Microsoft Navision, is scalable, reliable, flexible and modular, any or all of the modules may be combined, integrated and customized to create a perfectly tailored water management solution.

From the users in their daily operations to the decision making top management, easy access to information provides for accurate and rapid assessment of the business.

SUMS.WATER is multi-lingual, supporting fonts from Khmer to Japanese, ensuring a truly global user base. Devices like handheld terminals & barcode scanners are also supported.
